This is a subject which has been termilk has been found worth one cent hitherto but scantily treated in ethnographical statistics, but M. Korosi has collected about 30,000 data, and has come to the following ronclusions: Mothers under twenty years of age and fnthers under twenty-four have chibhen more weakly than parents of riper age. Their children are more subject to pulmonary diseases. The healthiest children are those whose fathers are from twenty-fivo to forty years of age, and whose mothers are from twenty to thirty years old. M. Korosi says that the best marriages are those in which the husband is senior to the wife; but a woman from thirty to thirty-five years old will have healthier children if her husband be somewhat younger than herself. A man from thirty to forty yours old ought to take a wife from twenty to thirty. If the mother be live years o'der than the father the vitality of the children becomes impaired.

The citizens of Ward I mel at Engine hall last Thesday evening to nominate town officers. There was a large number present who made things lively for a white. The constable force was reduced to three, and two of these were new men. A vote was taken to see what the sense of the meeting was in relation to having a lockup located here, and as a result, the unsjority did not think the ward needed one. Hon, James Humphrey was chalrman and F. A. Lawis secretary. The following nominations were made:—Selectman, Henry A. Nash; assessor, Wilanot Cleverly; constables, George G. French, B. Frank Thomas, Isaac H. Wulker; highway surveyor, Peter F. Haggerty; committee to general causas, Hon, James Humphrey, B. Frank Richards, Frank H. Torrey, F. A. Itteknell, F. A. Lawis Just before the ranens closed Wilmer Cleverly undle a few remarks in which he thanked the citizens for the coulcidence reposed in him and as he thought those who danged should pay the fidder, he asked permission to pay for the printing for the cauens, which was given burn.

To twhom it may concern:—

On Christmas day, last passed, it was my misfortune to be badly bitten on my hand by a man, the lattle finger being nearly bitten out.

It became very painful and my band was badly swollen, and syntoms of tockjaw began to appear. I had no sleep for two nights and cold chills were constantly running over me. Matters were growing serious and I was ad-lised to try Dorack's Salve, which I did, with very gratifying results. In less than one hour after applying it, the pain entirely ceased, and I continued its use unit mured. I have no hesitation in saving, that, in my opinion, it saved my hand, if not my life.

I can recommend its use to everyone, feeling justified in so doing, by its results in my own case. No tamily should be without it in the house for im mediate use in case of any accident.

Union Temperace Meeling.

A mass meeting of the briends of temperance was held in Lincoln hall last Sunday evening, addresses being made by resident speakers. The meeting was called to order by Mr. J. W. Armington. After the reading of the ninely-fourth Psalm by Hev. Wm. Hyde and offering of prayer by Rev. W. L. Smith, Mr. Armington made a few introductory remarks, saying that while it was well for the citizens to meet together as they bud done that evening, it was far more important to act in accordance with their principles. It was necessary to vale for men whose hearts were in the work and who would execute the law without fear. The overpowering influence of the dram shop against nil temperance teaching in the public schools was enough to convince him how he should vote on this spection. Men as they got the ballot lox are bound to remember those at home who cannot vote and to look after their interests. For the last year the town had enforcement of the law. Helore this the simple vote for medicense that but little goal. Universe, then, hopfile and those who declared that there was as much liquor sold here as iluring the proceeding year should ask themselves if they had ever in any way shore anything to aid in the suppression of that their School.

Mr. Uwen, principal of the North

consistence of lifteen was appointed, three from each waid, to arrange for meetings for the formation of young men's clubs and for receiving the personal pledge of each voter, so far as possibly, to be present at the polls and vote in favor of the amendment. Following is the committee: Ward 1, Francis A, Bicknell, B, Frank Richards, Rev. Willis D. Leiand; ward 2, Alphenis Bates, tieo, H, Cuninghain, Wablo Turner; ward 3, tieo, W, White, Chas, T. Crane, Marshall P, Wright; ward 4, C. W. Fearing, E. W. Notton, Chutles Hawes; ward 5, H. B, Reed, George to Torrey, C. A. Huut. The meeting also resolved that we recognize the great work of the wipsen in this cause and earnestly sodicit their coaperation.

The Prohibility Amendment.

amendment under the name of personal liberty.

Hon, S. B. Bradford claimed that constitutional prohibition was the most important matter before the American people. In Kansas they had in 1881, a very good statutory haw against the sale of liquor, but even statutory prohibition was a failure. Il you want prohibition to do its work, strike at the root of the tree and stop the manufacture. Put the foundation way down deep in the constitution of the State and then the legislators will be bound to enforce the law, and the people will believe in it. Colonel Chevis of Kentucky s 11 the

Colonel Chevis of Kentucky s 11 the idea he wanted especially to Impress was that the light in Massachusetts was not a light for Massachusetts was not a light for Massachusetts was not a light for Massachusetts turned its lakek upon a proposition for the abulition of a legalized grogshop." He koped that Massachusetts would be the leader in a movement to which the following would be the prohibition of the manufacture of lignor anywhere in the United States. forfolk County Masters' Club.

Norfolk County Masters' Club.

The monthly meeting of the above club was held at the Crawford House, Boston, hist Saturday morning, the subject for discussion being "The Course of Study in Language" in all grades below the High school, prepared by Messrs, Helcher and West, of Randolph, a general discussion following. Trincipal Downs, of the Weymouth South High school, offered a resolution in favor of the Constitutional Prohibitory Amendment, declaring that it is the sense of the clab that it should headonted. This gave rise to a lively discussion, after which the resolution was adopted by a large majority. In the course of the debate one of the speakers stated that in a rerent visit to one of the cities of Kansas he saw morning rational trinking than he had ever witnessed in Massachusetts, when another in head ever witnessed in Massachusetts, when another in head ever ful he very free from the vice, this show ing that drinking practices vary according to the disposition of the people in different places. Tublic sentiment is largely a controlling power in this matter, as we find in a statement of a friend from lowa, who says that the prohibitory amendment is thoroughly enforced its sunce places while in others it falls far short of being enforced.

The Prohibilory Amendment.

The defent of the effort to obtain a prohibitory amendment to the constitution of New Hampshire by popular voic, is thought to be intexicined if the result of the effort in this State for an amendment, but the supporters of the effort are working vigoronsly to carry the novement to a successful conclusion on the 22d of April, the women of the W. C. T. U. being especially active in the work, and if the Massachusetts legislators could have bestowed a general franchise upon the women of the State, their vote upon this question might turn the scale in its favor. That it will be a difficult matter to secure a majority vate of the man for the machaneut is deemed probable, but the workers for temperance will make a vigorous campaign for the success of the measure, an opening rally of its friends being held in Hoston last Tuesday, when encouraging addresses were made by noted leaders, among than being Hon. Volney B. Cushing, of Maine, Hou. S. B. Bradford, late attorney-general of Kansas, and Col. Chevis, of Kentneky. Mr. Cushing said the liquor questian had resolved itself into one between high license and prohibition. The prohibition lattle was how in Massachuselts. Legislation should be for the pathic good and not for the private appetite. To disregard moral and social laws was what is contended for by the enemies of this prohibilitory.

Mr. Parnell, remarks the Bostou Transcript, is a remarkable instance in medically in the stance in medical to the stance of the muler-took to champion the rights of un oppressed and powerty-stricken peasantry, and therefore the effort has been made to prove him the instigator of murder and assassination. The most powerful newspaper in England, backetiqy influential Tories, and the voice of u whole party, has not hesitated to strike at his character by imputing to him the authorship of letters which if geauline would blast his name forever. But suppass, as now seems probable, that the Tinax was the dupe of its own malignity, and published the cheapest of all forgeries and fabrications, how will the English public view Mr. Parnell after such a revelation? That is partially answered by the cumments of the London Acus elsewhere, Englishmen print themselves un their love of fair play, and their Indignation will wax hot against the Tiones and all engaged in this atracious glot against the great Irish leader. this entimess, patience and self-possession in all this dread ordeal which was to tear from him everything entitling him to common respect, by showing that he was no better than

A Delicious Dessert

Anyone interested in the grogress of arts in industry should witness the exhibition held this week at the ware-rooms of Faine's Furniture Co., 48 Canal street, Boston. We have not the space to speak in idetail of the many pleces of interest. Attacked to some of the principal articles are cards giving the significance of the hand-carving and ornamentation. Some very beautiful designs of the renaissance, romanesque and bizare types are included in the exhibition.

most of its werst nyinptoms are often in the brain.

Symptoms of disease as wall as diseases themselves are oftentimes followers or concentinate of some innesspected organic disease and this is peculiarly true of imag, liver, brain and heart diseases in general, for its now known that they are the result of kidacy disease, which shows its presence in some such indirect annuary.

Secretal years ago a gentleman became convinced of the truth of this, and through his offorts the world the been warned of kidney disease, and os a result of continued effort a specific known as Warner's Safe Cure was illacovered, the general use of which has shown it to be of inestimable benefit in all cases where kidney treatment is desirable or necessary. case where kilney treatment is desirable or necessary.

When consumption is threatened set to it that the condition of the kidneys is immediately inquired into, and if they are found illeaned, care them by an immediate use of Warner's Sefe Cure, and the symptome of long decay will repidly disappear.

There are too many instances already recorded of the terrible results produced by a tack of knowledge concerning the cause of disease, and human life is of too much importance to be foo ishly ancrificed to bigotry or ignorance. AS MILK

Amendment, spoke of the indifference and opposition of many to the temperance reform, instancing the vote on Nolleense at our annual town meeting, when in a registration of some 250 maly 900 voters mulfested their interest in the question by appearing at the pulls, and of the 100 votes mearly one-half were in favor of license. To this indifference he united the determined opposition of the lingur interests, who to this State have idealged \$100,000, to aid in defeating the Constitutional Amendment, and it was highly necessary that temperance reformers should put forth their namost efforts in anging upon the people the saleam duty of exercising their right and power on the 22d of April for the further suppression of the liquor traille. One of the weightiest arguoents for the prohibition of the manufacture of intoxicants was that 90 per tent, of the liquor sent to Africa ndment, spoke of the indifference

exerted.

In spite of indifference and apposi-tion and greed of gain Mr. Pitts said that in forty years just there had been remarkable progress in the temperance cause, and though the present hour was not a time for temperance, it was not a time for discouragement. As evidences of progress from the days when liquors were freely used in a great majority of families, when clergy-men and deacons of churches were al-dicted to drinking, he instanced the inen and deacons of churches were addicted to drinking, he instanced the statement of a gentleman who in 1845, when at Andorer Theological Seoimary walked up to the bar for a glass of toddy, which was mixed for him by a lirm supporter of the Seminary. Would such a position of a church officer or member be tolerated today? He further stated that in 1841 there were 13 rum distilleries, 2000 open barse 500 tavenus, in addition to the liquor selling grocers, in the State of Maine; now, says Hon. Nelson Dingley, there is not one-twenteth part us much drank there, and the sales are greatly restricted, while the population bas largely increased, and the trailie is an longer respectable.

Statistics of the results of prohibition as compared with licease were given, to prove that the latter system does not check the evil of intemperance, and reference was made to temperance advocates who believe that moral snasion is better than law in this battle against rum. Moral sussion, he said, had been tried, but with little avail. In western States women went to the saloons, and oraved that the business might be

nbandoned, but the traille still goes on. You may multiply normal suasion a hundred fold and it will not effect a cure. God instituted law and made it largely prohibitory. The emphatic "Thou shall not," shows that man needs the restraining influence of law, it is intemperance, and we need to make the law for its restraint organic. This is no lide move, but it has taken a deep hold on the public mind. Pawderly says we are forced to choose between rum and prohibition. In considering the advantages claimed for Constitutional prohibition, he said that a legislature can resistence. Breen—"Fle, fie, my good friend, don't give way to your ailments so easily, and settle down into such gloom and despondency. There's no excuso for such conduct, when it's a well-known fact that all your had feelings, terrible head-aches, poor uppetile, sense of fatigne, and lasslande, low-spirits, and hypochon-driend condition are due to torpid liver and consequent indigestion, and schillty, which will all give way and disappear, as the dew before the merning sun, if you hut make use of that world-fumed noti-billions, tonic medicine known as Dr. Ploree's Golden Medical liscovery. It is gnaranteed to beneft or cure in all diseases for which it is recommended, or money pall for it will be refunded. It cured me when I was in a much worse condition than you are, and if you will only try it, you will soon be singing—

"Ither my spirit shall wander—Through gay coral bowers,
And frisk with the mermadis—It shall, by the Powers!"

The world has need of more such men.

An incident led him into the mannfacture of medicine. Selead some twelve years ago with what the ablest physicians bermed familitiancy disease, he was mirraculously restored to hashb by what is now knows as Warner's false Cure. At once he resolved to make known the merits of so potent a remedy, and the consequence is that to day he has immense laboratories and warehouses in the United States, Canada. England, Gormany, Austria, Australia and Burmah. Sales of his Sale Remadies are commons, and their power over disease simply marvelous.

The merit of a production is in exact keeping with the character of its practiour. An houset and reliable man himself, Mr. Warner makes heasest and reliable main himself, Mr. Warner makes heasest and reliable medicine—a fact abundaally attested by their phenomenal sifficacy and popularity.

TREATMENT-In this, the diet is of importance, and the hygiene not to be neglected. Fresh it. and the hygiene not to be neglected. Fresh nir, exercise and ahundant clorhing are all important. Hibbard's Rheumatle Syrup is the only remedy. IT NEVER FAILS.

Containing the aicdicinal virtues of certain plants and roots of known alterative and dopurant natures, together with such remedies as Poke, Burdook, Wintergroon, divirence, healing and lavigorating, it becomes the "remedy of all remedies" for this most common and insidious enemy of mankind.
